Conceptual scheme of the book

Focus of the Conference

REGIONAL DISPARITIES IN SOUTHERN EUROPE: PROSPECTIVE SCENARIOS

- Methodology (1)

Chapter 1 of the book: Southern Europe at a Glance

- **The social filter** concept: indicators for demography, employment, social and human capital
- **Principal Component Analysis** for variable reduction and factor identification

REGIONAL DISPARITIES IN SOUTHERN EUROPE: PROSPECTIVE SCENARIOS

- Methodology (2)

Prospective scenarios

- Europe 2020 targets
- Projections

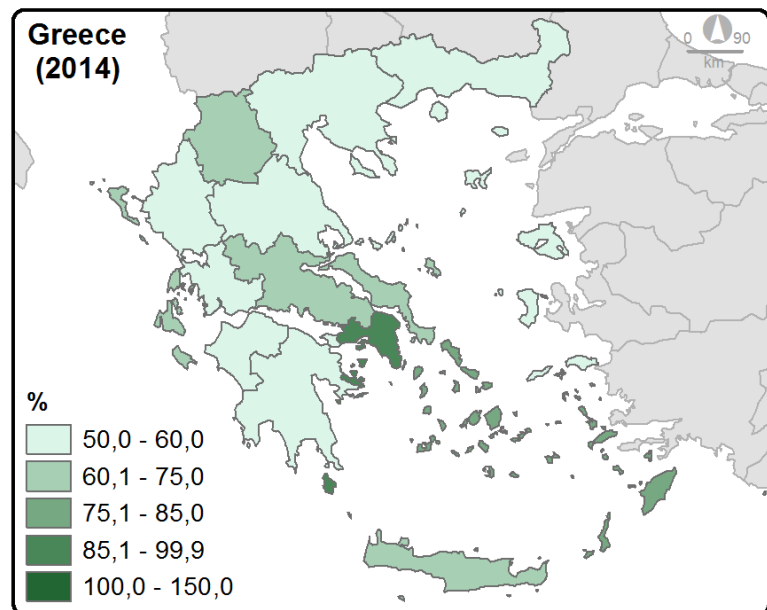

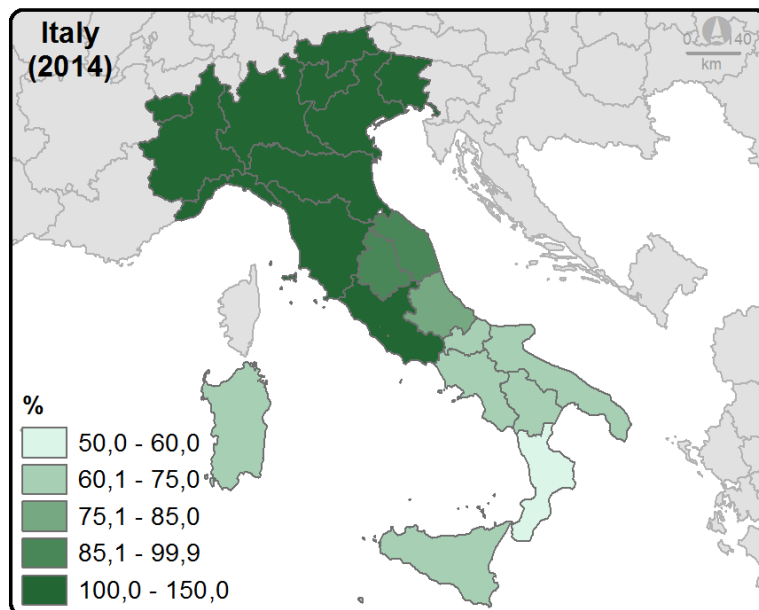

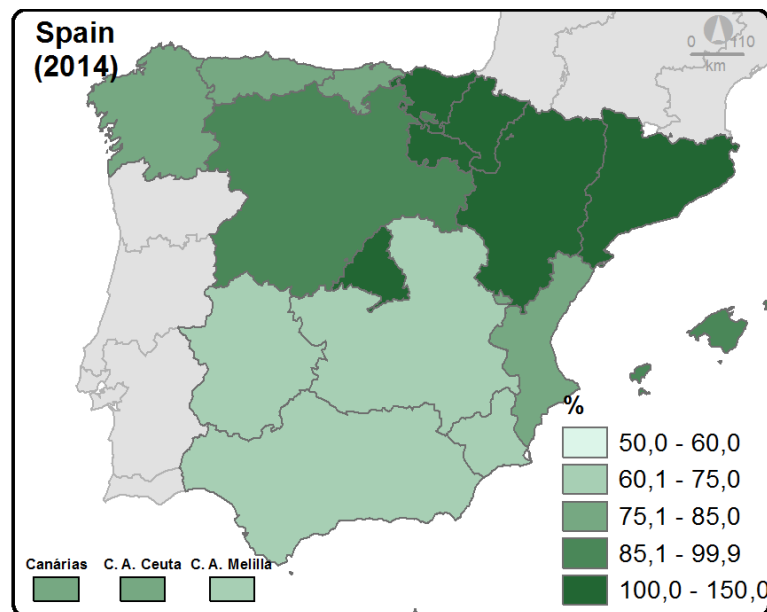

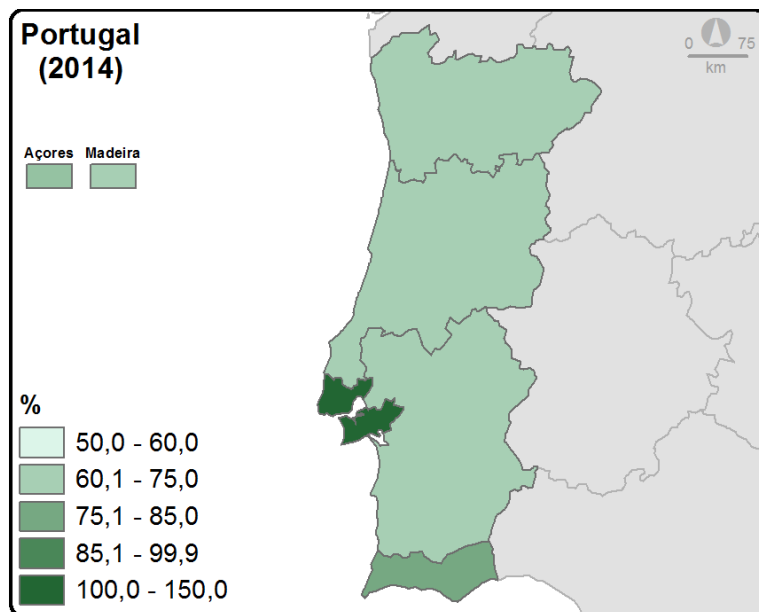

Data Base

- Eurostat data
 - All data was collected from Eurostat general statistics and the Eurostat's monitor for the EU2020 strategy
 - <http://ec.europa.eu/eurostat/web/europe-2020-indicators>
- Projections
 - Demographic projections were also collected from Eurostat and EU2020 indicators were derived through regression analysis (own elaboration)

REGIONAL DISPARITIES IN SOUTHERN EUROPE: PROSPECTIVE SCENARIOS

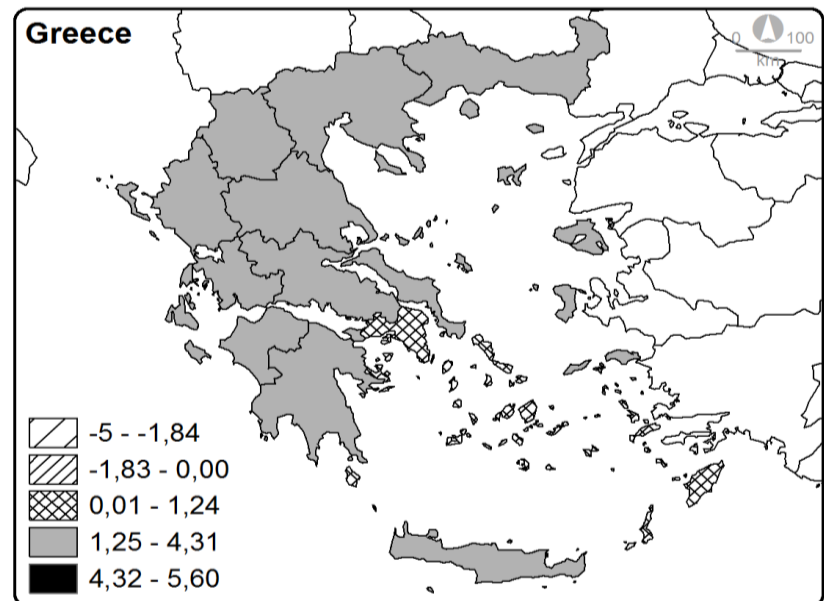

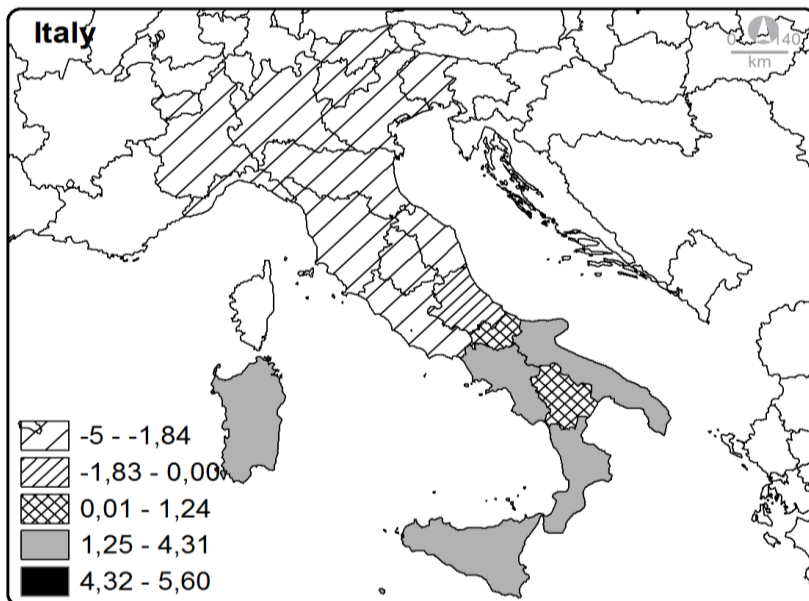

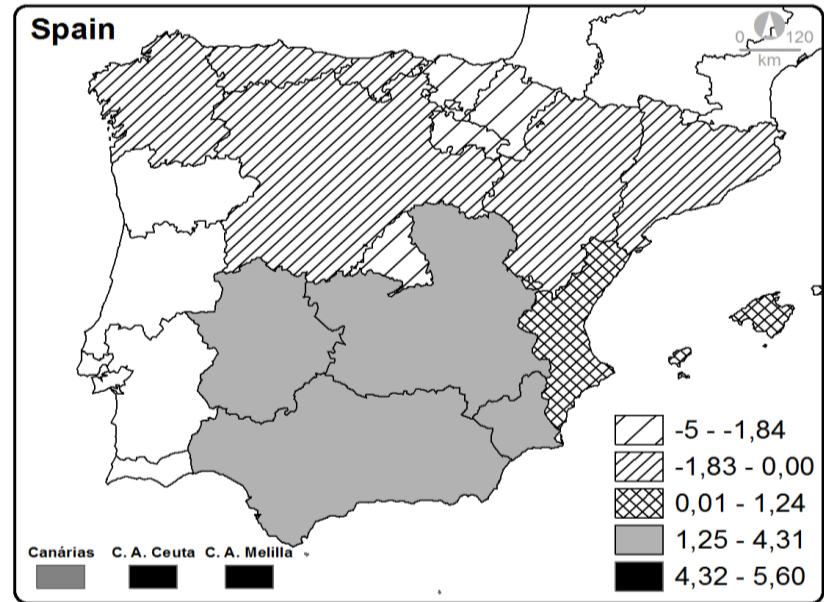

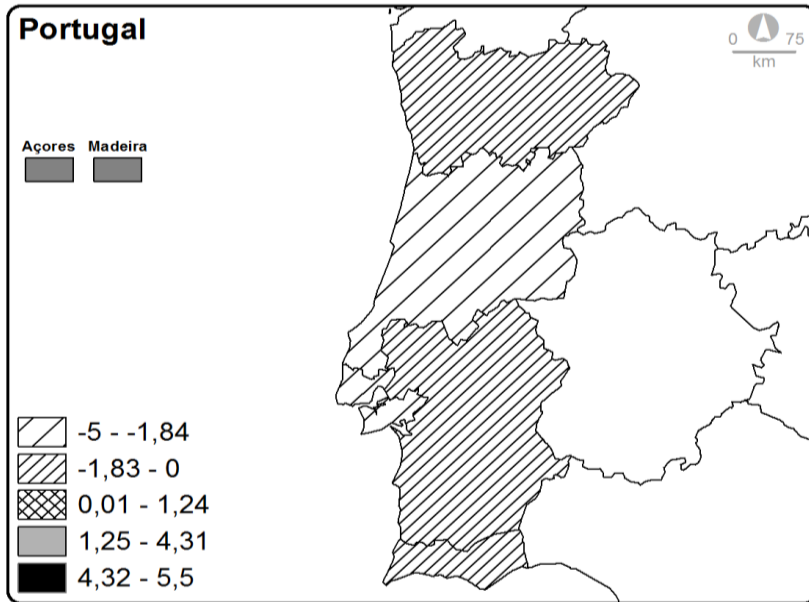

- Southern Europe at a Glance

GDP - PPS per inhabitant % (EU27 = 100) – NUTS 2

Factor 1 - The Unemployment Rigidity Factor

(Eigenvalue 9,270, variability 29,902%)

Unemployment rate (% from population 25 – 64)

Source: Eurostat

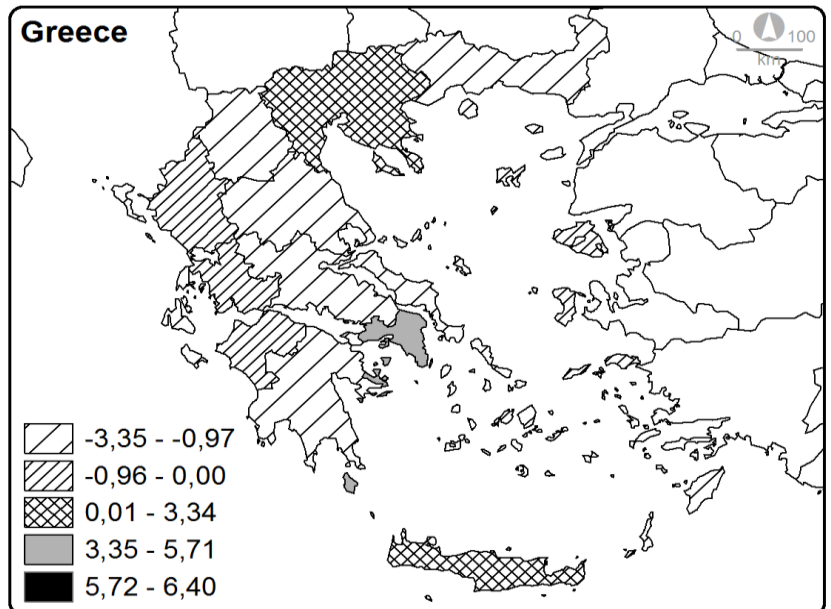

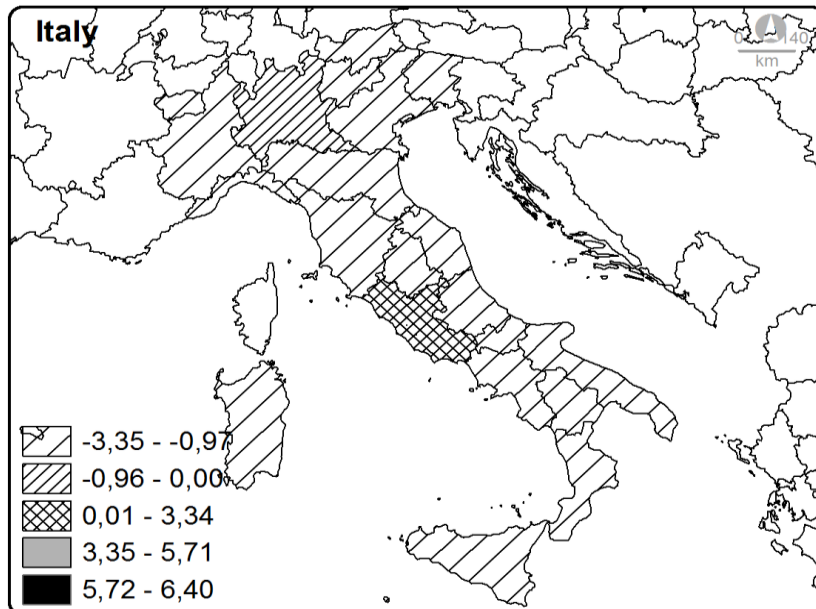

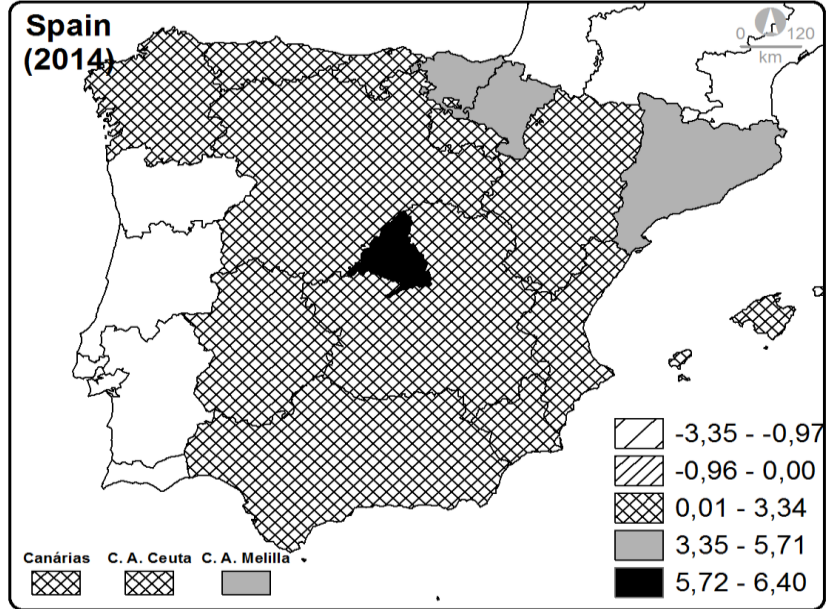

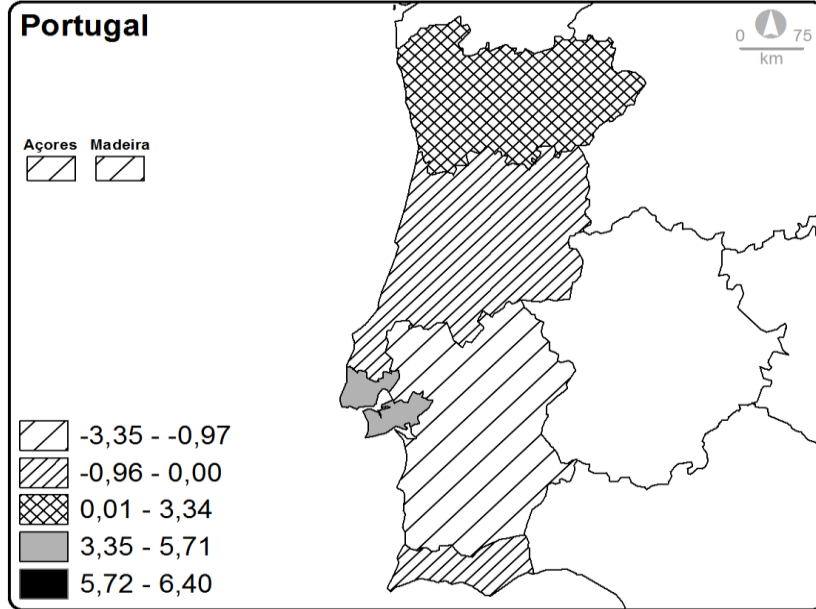

Employment rate (% from population 25 – 64)

Source: Eurostat

Factor 2 -The Human Capital and Innovation Factor

(Eigenvalue 5,544, variability 17,885%)

REGIONAL DISPARITIES IN SOUTHERN EUROPE: PROSPECTIVE SCENARIOS

- Meeting the EU 2020 targets: statistics and regional upgrading or convergence

Meeting the EU 2020 targets

- **The European crisis on 2008**

- The EU202 strategy was already designed in the context of the current European crisis which started by 2008 affecting most severely the Southern European countries;
- EU2020 identified the main consequences of this crisis: 1) at EU level GDP fell 4%; 2) industrial production dropped to 1990s levels; 3) Unemployment reached 10% of active population; 4) low average growth comparing with the Europe's main economic partners; 5) and demographic ageing was accelerating

- **The EU2020 strategy (2010) – the roadmap on growth and development for the new decade**

- EU 2020 intended to be a fully integrated program for all areas of development
- Three main priorities were defined for EU 2020 “**Smart growth**: developing an economy based on knowledge and innovation”, “**Sustainable growth**: promoting a more resource efficient, greener and more competitive economy”, “**Inclusive growth (growth for all)**: fostering a high-employment economy delivering social and territorial cohesion”.

Europe 2020 structure

<i>Europe 2020 Flagship Initiative</i>		<i>Europe 2020 Competitiveness Index</i>		
Flagship Initiative	An Industrial Policy for the Globalization Era	EUROPE 2020	SMART	Enterprise environment
	A Digital Agenda for Europe			Digital agenda
	Innovation Union			Innovative Europe
	Youth on the Move			Education and training
	An Agenda for New Skills and Jobs		INCLUSIVE	Labour market and employment
	European Platform against Poverty			Social inclusion
	Resource-efficient Europe		SUSTAINABLE	Environmental sustainability

Europe 2020 strategy headline indicators, EU28

Headline indicator		Past situation	Current situation			2020 Target
		2008	2012	2013	2014	
Employment	Employment rate, total (<i>% of the population aged 20-64</i>)	70.3	68.4	68.4	69.2	75
R&D	Gross domestic expenditure on R&D (<i>% of GDP</i>)	1.85	2.01	2.03	2.03p	3.00
Climate change & energy	Greenhouse gas emissions* (<i>index 1990=100</i>)	90.16	81.69	80.2	:	80
	Share of renewable energy in gross final energy consumption (%)	10.5	14.3	15.0	:	20
	Primary energy consumption (<i>Million tonnes of oil equivalent</i>)	1,686.6	1,583.9	1,566.5	:	1,483
	Final energy consumption (<i>Million tonnes of oil equivalent</i>)	1,173.3	1,102.4	1,104.6	:	1,086
Education	Early leavers from education & training, total (<i>% of population aged 18-24</i>)	14.6	12.7	11.9	11.2b	<10.0
	Tertiary educational attainment, total (<i>% of population aged 30-34</i>)	31.2	36.0	37.1	37.9b	≥40.0
Poverty or social exclusion**	People at risk of poverty or social exclusion (<i>Cumulative difference from 2008 in thousands</i>)	:	5993	5064	4527	-20000

* Total emissions, including international aviation, but excluding emissions from land use, land use change and forestry.

** People at risk of poverty or social exclusion are in at least one of the following three conditions: at-risk-of-poverty after social transfers (income poverty), severely materially deprived or living in a household with very low work intensity. Persons are only counted once even if they are present in several sub-indicators. The overall EU target is to lift at least 20 million people out of risk of poverty or social exclusion by 2020 with 2008 as a baseline year. All data refer to EU27.

REGIONAL DISPARITIES IN SOUTHERN EUROPE: PROSPECTIVE SCENARIOS

- Reflections/ Conclusions

- Going back to the Lisbon Strategy (2010)
 - Before assessing the feasibility of EU 2020, it is also important to retrieve the former Lisbon strategy or Lisbon Agenda for 2010, designed with similar objectives
 - what outcomes were delivered by the Lisbon strategy on Southern Europe?
- Human Capital vs Regional development
 - In the knowledge economy, human capital is the pillar for innovation and economic growth. Human capital endowment embodies educational stock and therefore higher education and qualification at higher levels of the school system are the most relevant components of human capital.
 - The link between human capital, innovation, economic growth and regional development
 - The effect of HEIs on economic growth and regional development

- **Where we are - 30 years of European Regional/ Cohesion Policy**
 - Regional development policies in Southern Europe have been repeatedly criticized because they have concentrated more in physical capital and less on human capital enhancement
 - After more than 30 years of European Regional/ Cohesion Policy, Europe should evidence a regional upgrading and convergence from the lagging regions. That is not the case, however.
 - Before feeding great expectations for 2020, it is important to do some ex-ante assessment of the policies that are being implemented
 - Monitoring and assessing the effects of the EU policies and structural funds on growth and convergence have been producing an immense amount of studies and reports however, we have not always been able to guarantee the expected achievements of the various plans

- **Education - Are the EU2020 targets enough?**
 - Some of the obstacles identified for the limits of the Lisbon Strategy were the high number of targets and the lack of efficient governance tools
 - In spite of the huge efforts developed in what concerns higher education and overall education policies, the persistency of the lagging behind vast territories in Southern Europe countries are troubling. *It is not enough to meet the marks of the EU 2020 targets for Education if there is not a real economic and social upgrading in those regions.*
 - Education is a condition but not the sufficient condition to foster growth and development.
