# *Access and Inequality in US Higher Education: Policy Issues*

David D. Dill  
Professor Emeritus  
Department of Public Policy  
UNC-Chapel Hill  
<http://dddill.web.unc.edu>

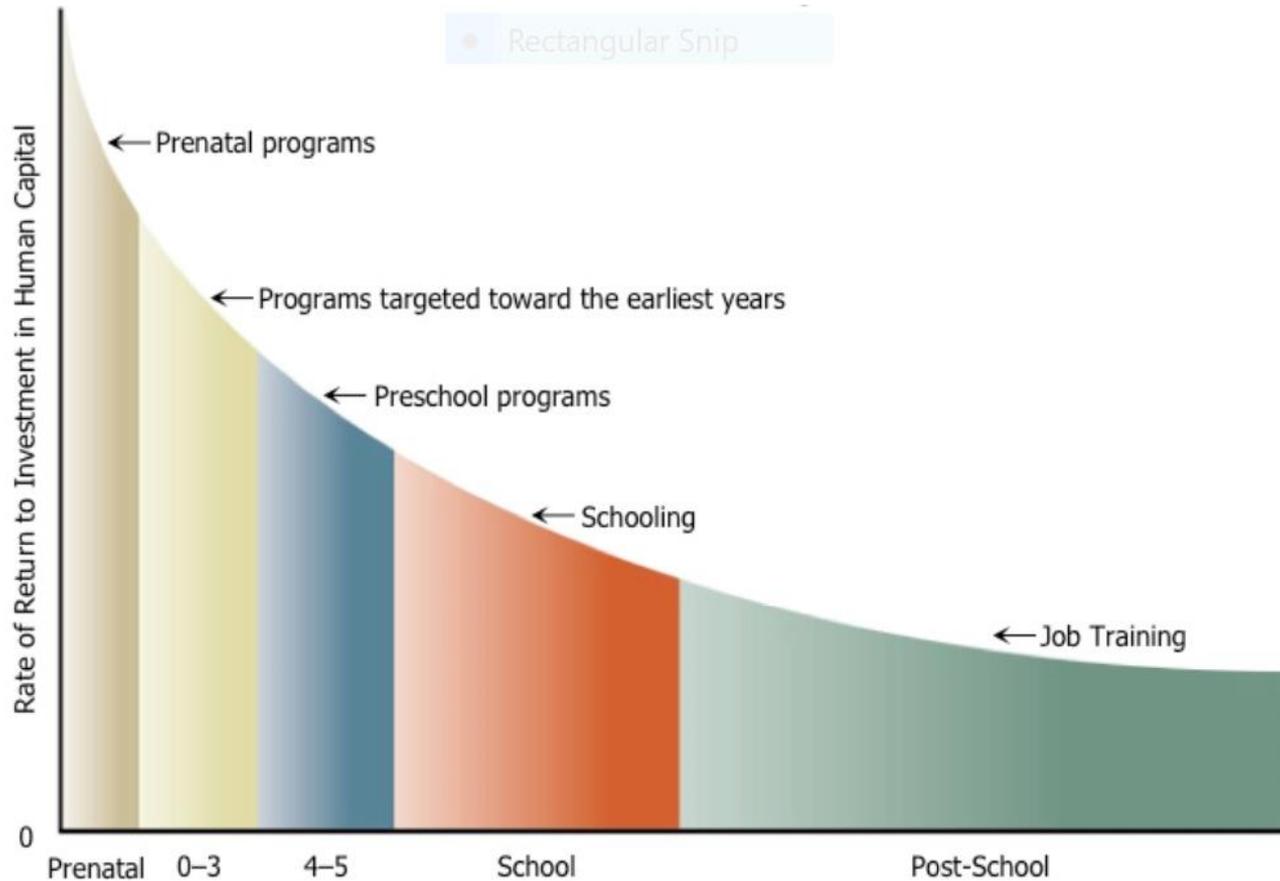

## *Introduction*

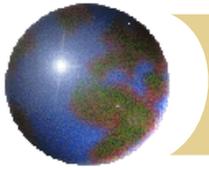

- ✦ Access to US higher education:
  - ▣ Percentage high school graduates enrolled in college stagnated since 1967
  - ▣ US trails several EU nations in tertiary education completion
  - ▣ Scandinavian countries have higher social mobility and lower inequality than US
- ✦ Causes of inequality/access issues in US

# *Return to Investments in Human Capital*

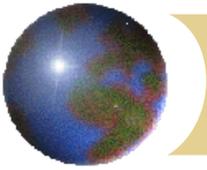

Heckman, 2019

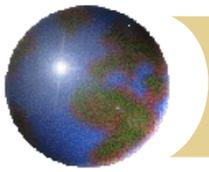

## *Access to US Baccalaureate Education*

- ✦ Institutions control access decisions
- ✦ Existing biases in admissions
- ✦ Equity: horizontal/vertical
- ✦ Issues regarding equity of access:
  - ❑ Financial Aid Policy
  - ❑ Informational/Behavioural Constraints Among Low-Income Applicants
  - ❑ Affirmative Action

## *US Financial Aid Policy*

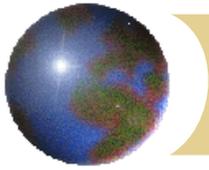

- ✿ Barr's Framework for Equity/Efficiency in Mass Higher Education
  - ❏ Competitive market; differential tuition/fees
  - ❏ Universal access requires government supported student tuition, fees, living expenses
  - ❏ Graduates repay government support through tax system based on current earnings
  - ❏ Higher education market “well regulated” for quality/efficiency

## *US Financial Aid Policy*

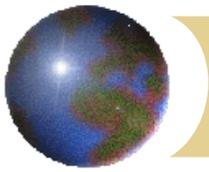

### ✿ Inequities in US Financial Aid System

- ❏ No national regulation of public/private tuition/fees
- ❏ Tuition/fees have risen to 50% of total public higher education revenues
- ❏ US college loans have fixed monthly payments; 10-year payback period
- ❏ Student loan default rates at all-time high
- ❏ Growth of merit-based, state financial aid for public colleges; but regressive policies

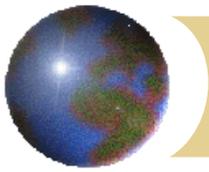

## *US Financial Aid Policy*

- ✿ Regulation of for-profit colleges:
  - ❑ Low student completion rates
  - ❑ Poor graduate employment/salaries
  - ❑ 4 X higher student loan default rate
  - ❑ Obama Administration: “Gainful employment regulation”; strengthened accreditation
  - ❑ Trump Administration: de-regulation of for-profit higher education

## *Informational/Behavioural Constraints for Low-Income Applicants*

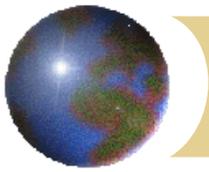

- ✦ Information provision and college rankings
- ✦ The “well-informed” consumer
- ✦ Do rankings utilize measures of societally-valued outcomes?
- ✦ US commercial rankings and measures of “academic prestige”
- ✦ The “Naïve” student consumer

# NYT College Access Index, 2017

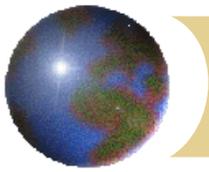

⊕

Rank	College	Freshman class	Pell grad share	Net price, mid. income	College Access Index	Endowment per student
1	University of California-Irvine	5,400	39	\$12k	1.90	\$11.1k
2	University of California-Santa Barbara	4,600	31	\$13k	1.61	\$7.1k
3	University of California-Davis	5,100	30	\$13k	1.60	\$11.2k
4	University of California-San Diego	5,200	29	\$11k	1.58	\$22.2k
5	University of California-Los Angeles	5,700	26	\$11k	1.52	\$54.2k
6	University of Florida	6,500	22	\$8k	1.46	\$33.3k
7	Amherst College	500	22	\$9k	1.44	\$1.141m
8	Pomona College	500	20	\$7k	1.43	\$1.288m
9	University of California-Berkeley	4,700	22	\$11k	1.38	\$46.3k
10	Harvard University	1,700	15	\$5k	1.36	\$1.51m
11	Vassar College	700	21	\$11k	1.36	\$397k
12	Williams College	500	18	\$7k	1.35	\$1.049m
13	Princeton University	1,300	16	\$6k	1.34	\$2.662m
14	Wellesley College	600	18	\$9k	1.32	\$763.1k
15	Stanford University	1,700	14	\$4k	1.31	\$1.448m
16	Knox College	400	26	\$18k	1.30	\$92.9k
17	University of North Carolina at Chapel Hill	4,000	18	\$10k	1.30	\$103.8k

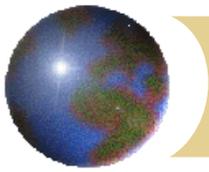

## *Informational/Behavioural Constraints for Low-Income Applicants*

- ✦ Comprehending “true price” of selective colleges; family “debt aversion”
- ✦ Necessary academic preparation/test scores for selective colleges
- ✦ Complexity of US financial aid process
- ✦ “Undermatch” of high achieving, low-income students

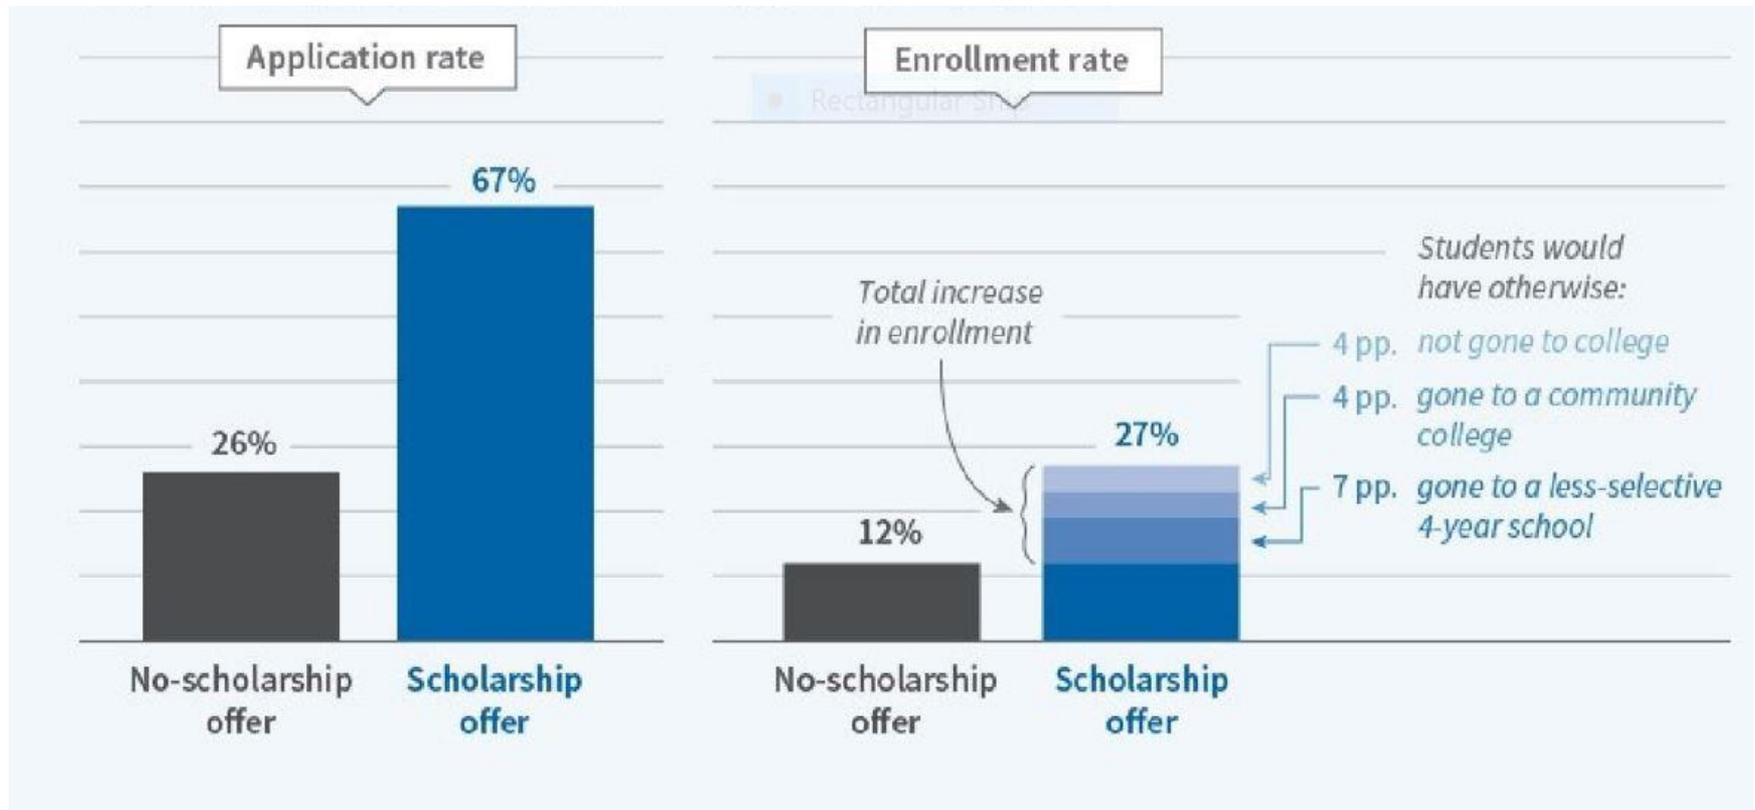

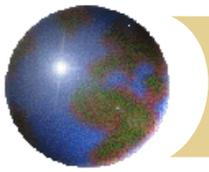

# *Informational/Behavioural Constraints for Low-Income Applicants*

- ✿ University of Michigan low-income scholarship program
- ✿ Michigan students in program received:
  - ✿ Personal mailing with invitation to apply
  - ✿ Promise of 4-year full tuition/fee scholarship if accepted for admission
  - ✿ Descriptive materials assisting students in application/financial aid processes
  - ✿ Supportive materials sent to student's parents and High School Principal

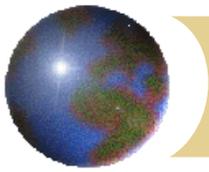

# University of Michigan Low-Income Scholarship Program

# *Affirmative Action Policy*

- ✦ 1964 Civil Rights Law
- ✦ 2003 Supreme Court Decision,  
Justice O'Connor:
  - ✦ “educational benefits from student body diversity”  
[a] “compelling interest.”
  - ✦ [but] “25 years from now use of racial preferences  
will no longer be necessary.”

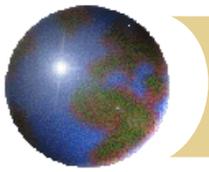

# *Affirmative Action Policy*

## ✚ 2019:

- ✚ 73% of surveyed US public say should not consider race/ethnicity in college admissions
- ✚ 8 US states now prohibit preferential admissions in public colleges by race, ethnicity, sex, national origin

## ✚ 2014, Dale and Kruger:

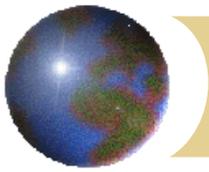

- ✚ Selective US colleges provide distinctive networking opportunities and life chances for low-income, minority admits

# *Harvard Domestic Applicants/Admits by Race and ALDC Status, 2010-15*

	# of Applications	Admit Rate
White	57,582	4.89
Black	15,664	7.58
Hispanic	17,970	6.16
Asian	40,415	5.13
(A) Recruited Athlete	1,374	86.0
(L) Legacy	4,644	33.6
(D) Dean/Director Rating	2,501	42.2
(C) Faculty/Staff Children	321	46.7
Not ALDC	142,728	5.45
TOTAL	166,727	6.67

Arcidiacono, Kinsler, & Ransom, 2019

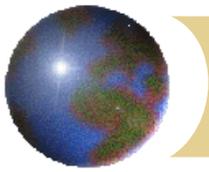

## *Affirmative Action Policy*

- ✦ Are there workable race-neutral strategies to achieve educationally beneficial diversity?
- ✦ Preferences for socio-economic class rather than race/ethnicity?
- ✦ Baker, Kasman, Klasik, & Townsend, 2018:
  - ❑ SES-based policy not as effective as race-sensitive admissions policies
  - ❑ SES-based policy with targeted race-based recruiting and “outreach” a feasible alternative

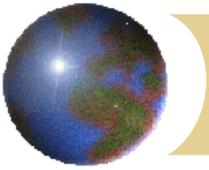

## *Affirmative Action Policy*

- ✦ Relevance of US AA to other nations
- ✦ Will increasing market competition and institutional autonomy encourage inequitable and unfair admissions preferences in other nations' mass higher education?
- ✦ Horizontal equity, admissions preferences, and compensatory policies
- ✦ Emerging diversity/discrimination in EU nations and the issue of affirmative action

## *Conclusion:*

- ❖ Students benefitting from public higher education should pay portion of educational expenses. Financial assistance available to all applicants. Eligibility for higher education financial aid simple/publicly clear.
- ❖ Government-supported student loans repaid by graduates through national tax system, adjusted for earned income. Loans repaid for set period and payments progressive. Government loan system should minimize public subsidy.

# *Conclusion*

- ⊕ Government regulation assures:
  - ⊞ efficiency of publicly supported higher education tuition/fees;
  - ⊞ institutional collegial processes for improving quality of teaching/learning;
  - ⊞ integrity of admissions decisions;
  - ⊞ validity/societal value of public information on institutions of higher education.
- ⊕ Public incentives for active outreach programs by selective institutions supporting applications from high achieving low-income students, as well as applicants from groups designated by national policy for preferential consideration.
